This course in Interdisciplinary Product Development is team-taught by faculty members from three colleges: Architecture & the Arts, Business Administration, and Engineering. Teams of six or seven students from industrial design, marketing, and engineering work together to identify and develop opportunities for new products in a broad market arena defined by a corporate client/class sponsor. The year-long (2 semesters) design process of identifying and developing a new product opportunity will culminate in the creation of form and functional prototypes. Each team will make four presentations of course progress to management of the client company.

The corporate client for 2005-06 is Pactiv Corporation (Hefty brand). They have provided an interesting and challenging assignment, as well as significant financial support for the course. They will also be sharing proprietary information and knowledge with the class. All students will be required to sign a Confidentiality Non-Disclosure Agreement (NDA) and an Intellectual Property Agreement (IP) that gives the client ownership of the work product of all student teams and faculty. This arrangement has been approved by the University legal department as well as the Deans of the three colleges.

Class Meetings
Tuesdays 2:00-4:30pm  315 BSB  (Unless announced otherwise)
There will also be team meetings with faculty until 6:00pm.
